

## **FRAM/Autolite/Garrett**

### Description:

In 1951 FRAM developed the first dry-type carburetor air filter, a revolutionary design that was significantly different than the previous oil bath air filters. Today FRAM continues to produce high quality air filters for a wide range of vehicle makes and models. Regular replacement of air filters helps to protect your engine, avoids excessive wear and improves gas mileage. So remember, before you slam it, FRAM It!
